PROFESSIONAL SUMMARY

Full-stack Software Developer with 2 years of experience building scalable backend services and internal tooling in Java, Spring Boot, and the React/NextJS ecosystem. Proven track record of replacing third-party SaaS tools (Jira, Facto HR) with in-house platforms, and automating manual business processes. Strong in REST API design, system design, and cross-functional delivery.

WORK HISTORY

Twinline Business Solutions - ***Software Developer (SDE-2)***
Gurgaon, India • 08/2025 - Current

- Architected and built Trackr, an in-house issue-tracking platform rivaling Jira's core functionality, using React 18, Java 21, and PostgreSQL — now used by 500+ users across 30+ corporate clients (MFIs and NBFCs), eliminating per-seat licensing costs
- Designed and delivered an in-house HRMS platform (in-house FactoHR replacement) with a Java 17 web app and companion React Native mobile app, serving 80+ employees org-wide

Twinline Business Solutions - ***Software Developer (SDE-1)***
Gurgaon, India • 12/2024 - 08/2025

- Built and integrated REST APIs for HDFC, IndiaFirst, and Bajaj Insurance policy creation and status-inquiry workflows
- Automated end-to-end billing voucher generation across 30+ corporate clients, eliminating a fully manual invoicing process
- Built an employee tracking system with a Next.js frontend
- Integrated Jira's Open APIs to build a two-way sync module between internal and external Jira instances

Twinline Business Solutions - ***Software Development Intern***
Gurugram, India • 08/2024 - 11/2024

- Applied core Java, Spring Boot, Hibernate, and DAO patterns to build paginated financial reports for the company's LOS/LMS product suite
- Built financial dashboards and improved platform UI/UX

SKILLS

Java11 , Java17 , Java21 , JavaScript

System Design

Spring Boot , Hibernate, JPA/DAO, REST API Design

React 18, NextJS (SSR), React Native, HTML/CSS

PostgreSQL, Oracle , MySQL, Firebase

AI-Assisted Development: Claude, GitHub Copilot

EDUCATION

Chitkara University
Rajpura,Punjab • 08/2020 - 08/2024

Bachelor's of Engineering: Computer Science And Programming

PROJECTS

Trackr – In-House Issue Tracking Platform — React 18, Java 21, PostgreSQL

- Built a Jira-style issue-tracking tool from scratch with custom workflow and ticket-management features beyond Atlassian Jira, using AI-assisted development (Claude) to speed up delivery — now adopted by 30+ MFI/NBFC clients with 500+ active users, replacing a licensed third-party tool and cutting per-seat costs.

SocialItUp Clone — Next.js, Firebase

- Built a marketing site clone using Next.js SSR, paired with a separate serverless admin panel for lead management, real-time chat, and role-based access control, using Firebase as the backend
